

Laboratory Stirrer

LR500A/B

Max. Speed Range	34~340rpm	100~1,000rpm
	LR500A	LR500B

Powerful DC brushless motor and direct drive system have been adopted to achieve high torque. Stirrer with digital tachometer and torque monitor for easy setting and checking.

- DC brushless motor considered superior in safety as there are no brushes to cause sparks and no brush replacement required.
- Direct-drive system reduces noise and require low maintenance.
- Achieves high torque enabling stirring of high viscosity solution.
- Digital tachometer for easy speed setting and confirmation.
- Load on the stirring shaft can be monitored by LED 2-step display. An overload lamp turns on when exceeding the maximum load, stopping the motor automatically.
- Revolution feedback control function can maintain the setting rate despite change of load (especially suitable for high viscosity samples)
